OCTAFORM®
FOOD PROCESSING

State of the art indoor Food Processing Facilities need a sealed, smooth, reflective, and highly durable food-grade surface throughout the production rooms, the entry vestibules, and often beyond, into the processing and storage areas of the building envelope. **QuickLiner™** easily fastens to existing structures, protecting your walls and ceilings from corrosive elements while creating a clean, bright environment.

BUILD IT TO LAST

PROTECTS WALLS & CEILING

INDUSTRY-LEADING DURABILITY

REDUCED MAINTENANCE

HIGH SANITATION STANDARDS

1 SNAPTRIM™ EDGES No caulking or sealant is required. Finish quickly and professionally at any wall location. Easily replace damaged or vandalized panels without removing and re-installation.

2 DURABLE PVC Our heavy duty panels are extruded from an industry leading grade of PVC. Available in 18" widths and lengths between 8' and 20'.

3 TONGUE & GROOVE Wide interlocking tongue and groove joint hides fasteners and allow a quick and simple installation.

4 NAILING FLANGE Panels can be fastened to any structure and are typically supported every 16" to 24". Our design accommodates expansion and contraction in varied temperatures.

HIGH **QUALITY** VIRGIN PVC

BUILT TO LAST | BUILDS QUICKLY | FOOD SAFE | CLASS A FIRE RATED | CORROSION RESISTANT

GMP COMPLIANCE ✓

Octaform **QuickLiner**™ certified food-safe virgin PVC panels are specially engineered to ensure GMP compliance. Panels and seams can be power washed or washed with a variety of cleaning solutions and contain a unique locking seam design to ensure the performance and cleanliness of the joint.

CLEAN ROOM CERTIFIED ✓

Clean rooms built with Octaform **QuickLiner**™ and combined with an appropriately sized HEPA filtration system will exceed cleanroom standards.
